

World Meningitis Day (April 24, 2019) Social Media Messages and E-Mail Signatures

FB Updates:

1. Parents, did you know that all preteens and teens need a meningococcal vaccine at 11-12 years of age, with a booster dose at 16 years? Learn more at <https://www.cdc.gov/vaccines/vpd/mening/index.html> . #WORLDMENINGITISDAY
2. Meningococcal vaccines are safe and effective. Available vaccines could prevent many of the meningococcal disease cases in the US. Learn more: <https://www.cdc.gov/vaccines/vpd/mening/index.html>. #WORLDMENINGITISDAY
3. Parents, don't take chances with your childrens' health! Check their shot records, talk to their doctor, and see what vaccines they need to stay healthy. #WORLDMENINGITISDAY
4. Meningococcal disease can kill in 24 hours, so recognizing the symptoms and acting fast is crucial. You can learn more about the signs and symptoms of meningococcal disease here: <https://www.cdc.gov/meningococcal/about/symptoms.html> #WORLDMENINGITISDAY
