

SDIR New Release Ver 10.3 notes

Features:

- Decline shots option from the Forecast module.
 - This will allow for auto generated refusal/shortage notes added to activity log

Users have option to mark on vaccine forecasted if refused by patient/parent or shortage.

Once option is selected it will automatically record a note in the activity log.

You can click on vaccine underline for the pop up box to appear. You must select each vaccine that applies.

Log ID	Log Type	Log Date	Notes	Ref ID
12599737	Shot Refusal	10/14/2011	11 Tdap - Refusal	--
12285134	Transcribed	09/12/2011		--
12285135	Save	09/12/2011		--

Activity log – Vaccine noted as refusal/shortage, it will not appear as a Missed opportunity on your MO report 😊

Feature:

- Option to view/save in PDF or Excel

The screenshot shows the 'Missing Immunization Report' form in the SDIR 10.3 FC 2 application. The form includes fields for Facility, Age Range, Criterion, and Other Criteria. The 'Run on Reporting Server as:' section at the bottom has two radio buttons: 'PDF' and 'Excel', both of which are highlighted with a red box. A callout bubble points to these options with the text: 'All reports will now have two options to view or save in PDF or Excel format'.

- Printer setting for Misaligned Reminder/Recall labels.

The screenshot shows the Windows 'Print' dialog box. The 'Printer' section is set to 'Microsoft Office Document Image Writer'. The 'Print Range' section has 'All' selected. The 'Page Handling' section has 'Copies' set to 1 and 'Page Scaling' set to 'None'. A callout bubble points to the 'None' option in the 'Page Scaling' dropdown with the text: 'For users experiencing issues will misaligned labels. Page scaling option on printer should be set to "None".'
