TIME SENSITIVE INFORMATION

Expiration Date Now February 15, 2010 – Shortened Shelf Life
50 Lots of Sanofi Pasteur H1N1 Vaccine in Pre-Filled Syringes – both 0.25 mL and 0.5 mL formulations

Sanofi Pasteur is advancing the expiration date of 50 lots of H1N1 influenza vaccine shipped between November 2009 and January 2010 because of decreasing potency. These 50 lots include 14 lots of 0.25 mL pre-filled syringes and 36 lots of 0.5 mL pre-filled syringes.

Their labels currently have expiration dates between **March 4, 2011 to June 9, 2011.** Their new, revised expiration date is now **Monday, February 15, 2010.**

There is no need to re-administer doses already given from these lots.

If you have doses remaining from any of these lots, please move them to the front of your refrigerated storage units and use them first before those with later expiration dates. We also encourage all affected providers to

- order additional vaccine via [CalPanFlu](http://CalPanFlu.org) if necessary.
- ensure that children under 10 years of age are receiving the recommended two doses of H1N1 vaccine.

Currently, we have sufficient supplies of H1N1 vaccine and will process your order on a first-come, first-serve basis. Vaccine orders are being filled daily and you should receive your vaccine within one week of ordering.

Thank you for your patience and for your vigilance in protecting California from H1N1.

The following lots have a newly reassigned expiration date of Monday, February 15, 2010:

- **0.25 mL pre-filled syringes, 10-packs (NDC # 49281-650-25)**
